

## STUBBI Rollers

**NEW**

### Features

- Rated 10/10 and the 'must have tool in commercial flooring' - product review by independent certified flooring instructors
- Endorsed by reputable manufacturers and training associations such as Altro, Fita UK, Quantum Profile Systems, Floorskills and Armstrong
- Short, ergonomic tools that can be easily carried in person and used in tight space applications, under counters, behind toilets, pipe work etc

- Heavy duty construction, steel roller and frame with bearing driven axis that provides smooth operation and longevity at worksite environments
- Pressure point tip, unlike conventional square rollers, the curve of the roller head can provide a pressing point of extreme pressure when directed with force at problematic areas

### Benefits

- Speeds up installation time while simultaneously adding value to the finish
- Designed to remove failure points in high risk environments like hospitals, schools and transportation installs where repair downtime is extremely disruptive and costly
- Use Stubbi rollers to achieve a perfect 90 degree upturn in flash-cove, cleanroom and wet room applications
- Pressurises water-based contact adhesive required for enhanced curing and adhesion
- Removes repetitive strain pressure from hands and wrists caused by traditional 'push fitting' of installation components
- Precision machined to mirror the cove former profile for an exact fit.
- Pre-rolling the cove profile into the wall / floor junction removes air pockets and undulations where bacteria can live and breed, essential for healthcare

- Stubbi installation techniques support the floor coverings at the weakest point, the radius upturn
- Stubbi Rolling of sheet floor coverings onto cove former during the installation will guarantee adhesive transfer and removes any liability of movement in the flash-coved riser.
- The force produced by Stubbi Rolling reduces the need for applied heat during installation
- Stubbi LinoCove can be used for careful manipulation and moulding of marmoleum applications where it is required for flash-coving in both custom cove (picture framing) or conventional coving.

### STUBBI Roller with 43 mm roller

for flash-cove installations  
or conventional coving

Order no. 224 400 500

### STUBBI Roller small with 28 mm roller

for coves and other PVC,  
Lino or LVT installations

Order no. 224 400 550
