

For medium-sized areas!

Grinding machine BS-580

Direct-
drive
without
belt

Effective machine, with high grinding pressure,
easy to operate and versatile.

- The BS-580 is equipped with two grinding units, which rotate in opposite directions.
- The two counter-rotating grinding units combined with the high grinding pressure ensure particularly effective removal, while the machine is easy to operate.

Grinding Tools:

The BS-580 is equipped with the Janser Quick-Change tool system and can be used in various applications in all areas of subfloor preparation.

Machine equipment:

For each equipment 3 identical clockwise and 3 identical anti-clockwise grinding tools are required. (Machine comes without grinding tools)
